BOARD OF TRUSTEES' REPORT.

INDIANA STATE SOLDIERS' HOME, October 31, 1906.

HON. J. FRANK HANLY, *Governor of Indiana*:

Sir—The Board of Trustees of the Indiana State Soldiers' Home respectfully submits herewith its annual report for the year ending October 31, 1906, showing the condition of the Home, the receipts and expenditures thereof, the number of members and how they are cared for, together with such suggestions and recommendations concerning the institution as to the board seems proper.

The first great need of the institution is an enlargement of quarters. At present there are 250 applicants for membership on the waiting list, besides 200 out on furlough, and the number will increase from month to month until provision is made for their accommodation. In the judgment of the board there should be provided quarters for at least 500 applicants at the earliest possible moment, and to supply the same in part the board recommends that a new hospital be erected at once with a capacity sufficient to care for at least 125 patients, and that the present hospital be converted into quarters after making necessary changes, repairs and extensions, which would involve an expenditure of from \$12,000 to \$15,000, thus providing room for waiting applicants to the number of about 125. In addition to a hospital, with all modern appliances, there should be a building for old men with a capacity of 125. This building should be so constructed as to make it convenient for old and feeble men who are unable to go out of the building for their meals.

Any increase in the capacity of the institution will, of course, require additional heating and lighting facilities, which the board has recommended to the legislative committee appointed by your Excellency, stating the amount of money required for each item.

The last Legislature appropriated the sum of \$2,000 for hospital kitchen and porches, \$1,152.65 of which was expended in the construction of the kitchen and the remainder—\$847.35—turned back into the treasury, as it was not thought advisable to expend the same for porches pending the request for a new hospital.

The sum of \$2,500 was also appropriated for water plugs, pipes, fire plugs and ice pond, \$549.34 of which was returned to the treasury, as the construction of an ice pond was not thought advisable from a sanitary point of view.

Of the appropriation of \$4,000 for repairs there remains in the fund the sum of \$270.31, also returned to the treasury; also \$767.13 from the appropriation for sewers returned, as the amount was not sufficient to do the work in a manner that would be of material benefit to the institution.

The physical and sanitary conditions at the Home at this time are very satisfactory, perhaps better than they have ever been since the establishment of the institution.

For further suggestions, recommendations and statistics, the board respectfully refers to the approved reports of the Commandant, Adjutant and Surgeon hereto attached, marked respectively, Exhibits "A," "B" and "C," and made a part thereof.

Respectfully submitted,

WILLIAM S. HAGGARD, President.

LOUIS B. FULWILER, Secretary.

JOHN W. RINEAR, Treasurer.

COMMANDANT'S REPORT.

To the Board of Trustees, Indiana State Soldiers' Home:

Gentlemen—I have the honor to submit herewith my report for the year ending October 31, 1906, and also the accompanying reports of the Adjutant and Surgeon.

For detailed information as to the membership of the Home, receipts and disbursements for the year, the condition and work at the Hospital and Medical Department, and the administering of the affairs of the Home during the past year, I call your attention to said reports.

During this period considerable progress has been made in improvements—cement walks have been extended in camp and also to the cemetery; cement floors have been laid under the Commandant's residence, Commissary, and also at the Hospital, as much as the appropriation would do. Sewer, water and steam pipes have been extended. New water hydrants have been placed, greatly adding to the security of the Home in case of fire. The cemetery has been properly drained with drain tile.

The Widows' Home was completed during the past year and is now occupied. This building has 108 rooms, including dining-room, kitchen and the necessary toilet and bath-rooms. This has greatly relieved the congested condition of the Home, but the accommodations are still inadequate. At the rate applications are coming in more room will have to be provided in order to accommodate the increasing demands.

Permanent brick extensions have been made to the kitchen of the Hospital, and also at the Old People's Home. These additions give ample room for the work to be done and will add to the comfort of those employed because of good ventilation. The laundry has been enlarged to meet the increasing demand.

A new brick oven has been erected adjacent to the main dining-room kitchen, with a capacity sufficient to meet the demands of the Home.

The new heating and electric light plant erected on the grounds along the public highway at the foot of the hill and close to the present pumping station, has been in use for some time and is giving very good satisfaction, furnishing sufficient heat and light for the entire Camp at the present time.

With the appropriation made by the last General Assembly a beautiful flagstaff, one hundred feet high, made of "Washington fir," has been erected on the grounds.

During the year past, Wayne and Jasper counties have each erected an eight-room, two-story cottage, with toilet and bathrooms on both floors. These buildings cost \$4,000 each, and will accommodate thirty-two persons. Miami County has made an appropriation of \$3,500, which will erect an eight-room cottage. This will be built in the early spring.

The demands upon the Home for admission far exceed its capacity. The physical condition of those applying and received are in a marked degree different from those heretofore admitted. They are older in years, more feeble in health, less able to perform any kind of work and requiring more care and attention from nurses and attendants. This is convincing evidence that in a very short time the Home will be one vast hospital and convalescent camp. If this condition increases (as it seems to me it must) in the coming years, it will find the present Hospital inadequate for the demands.

Much has been said recently by the public press about the Hospital and its sanitary condition. That it is faulty in construction can not be denied by those competent to judge, yet it is the only place we have to care for the sick and must be used until something better can be provided. Those in charge are doing all they can with the means at hand to keep it in a clean and sanitary condition.

In this connection I suggest that a separate building be erected for the use of the employes and nurses, the rooms

now occupied by the nurses being on the second floor of the Hospital building, with an open rotunda connected with the first floor, making their quarters not only noisy but in my opinion unhealthy.

The sanitary condition of the Camp is very good, and every effort is being put forth by officials to keep the buildings and grounds in a strictly sanitary condition.

The discipline of the Camp, personal conduct of the members, general contentment and order has never been excelled; yet I would not have you infer from this statement that everyone is satisfied or obedient to the rules of the Camp. Such a condition is not to be expected in a Home of more than eleven hundred old people, broken down in health, suffering from disease incident to old age and the veterans from all the ailments produced by years of exposure in the service of their country. A good per cent. of the membership are church-going people, take much interest in church and Sabbath school work and are regular attendants at all religious services.

The Rev. F. M. Cones, Chaplain, conducts the religious services in the chapel every Sunday, and in addition holds midweek prayer meetings in the Hospital and Widows' Home and visits and converses with the sick. All of these services are well attended. Frequently song services and other entertainments are held for the benefit of the members of the Home.

For the future welfare of the Home appropriations for the following improvements should be made: New hospital building for old men, ice and cold storage plant, trunk and lateral sewers, improvement of grounds, building for old people, new engine and boilers for power house and electric light plant, cement walks, painting and repairs, building for nurses, walks and drives in cemetery, roadway to new hospital, memorial hall, extension of street lights, and a greenhouse should be built in order that plants may be provided for the grounds and flowers for the sick rooms and hospital.

Sunday preceding Memorial Day and Memorial Day were properly observed. After the annual address the members of the Home Sabbath school, children and friends, marched

to the cemetery, where the ritual of the Grand Army of the Republic was carried out and all graves decorated with flowers and flags.

To the members of the Board of Trustees, officers and employes of the Home, I render grateful acknowledgments for their kind and generous treatment during the past year.

Respectfully submitted,

RICHARD M. SMOCK,

Commandant.

EXHIBIT C.

SURGEON'S REPORT.

Col. R. M. Smock, Commandant:

Dear Sir—I have the honor to submit to you this, my first biennial report as Superintendent of Medical Department. The report shows somewhat in detail the movements in my department during the past year, and I beg to make some suggestions for bettering our accommodations for care of our physically and mentally afflicted members. The Home is in serious need of a new hospital for care of those who are physically ill, and if we are going to care for those suffering mental aberration, we must have provision. It is impossible to care for this class of patients with our present accommodations.

In the department for men are three members locked in their rooms suffering dementia. Two of these men have had several disturbed and mild maniacal periods and can not safely be taken from their rooms except by male attendants.

In the department for women are seven cases of dementia, one being epileptic, having frequent maniacal exacerbations. One also has marked homicidal and suicidal tendencies. As to care of our members suffering tuberculosis pulmonalis, we are totally unequipped, excepting the tent accommodations, which should be increased from capacity of one to that of at least twenty-five.

It is gratifying to note improvement in health of Home, due very probably to better sanitary conditions of Camp. Although the membership has steadily grown, the mortality is less by three than two years ago, and by fifteen than last year. We maintain a chartered training school for nurses, with enrollment of twelve pupils, soon to be increased to fourteen, well chosen young ladies, giving their best efforts to the Home, and are appreciative of staffs' efforts to educate them in their profession.

I desire to commend my subordinates for the able, efficient and conscientious manner in which they have performed their duties in their several positions. The Medical Department also wants to express gratitude to the consulting and lecturing staff for valuable assistance. I thank you for numerous courtesies and estimable support.

Respectfully submitted,

S. R. CUNNINGHAM,

Surgeon.
